PROFILE

I am an upcoming AI developer and data analyst with hands-on experience using Python, SQL, React, and FastAPI. I enjoy building practical projects, integrating free APIs, and learning quickly through real work. I'm currently focused on AI development, data analytics, and full-stack applications.

SKILLS

Programming & Data: Python, SQL ,Power BI, Excel

Development: React, FastAPI, API integration

PROJECTS

- Outdoor Activity Planner
- Smart Agriculture Assistant
- AI chatbot, live farming data, and crop disease dataset
- KMS Inventory SQL Case Study

EDUCATION

B.Sc. Aquaculture and Fisheries
University of Ibadan(2018-2024)

Studied the biology, management, and production of fish and other aquatic organisms.

Covered areas such as water quality management, fish health, aquaculture systems, hatchery operations, and aquatic ecology.

Gained foundational knowledge in fish nutrition, culture techniques, breeding, and sustainable fisheries management.
